 Bluetooth®

Welcome to Innovation, Design and Freedom

The innovation, design and freedom you get from using Jabra headsets, speakerphone and mobile accessories have made Jabra one of the world's leading names in the hands-free, mobile communications market.

Our award-winning headset portfolio features wireless and corded models for every kind of mobile lifestyle, with designs that integrate comfort with technology – enabling you to use mobile communication freely and naturally.

Jabra has a Bluetooth® mobile solution to suit everyone, combining comfort, sound quality and ease of use to make phone calls as natural as face to face conversations.

Whatever style you choose you can be assured that everything we know about personal mobile communications is built-in – exceptional performance, comfort and reliability.

What is Bluetooth wireless technology?

Bluetooth wireless technology is an open, accepted standard for wireless communication which means that Bluetooth equipment can communicate as long as they are within 10 metres of each other, making it possible to transfer data, speech, music or images without a physical connection.

In the mobile phone market Bluetooth wireless technology connects speakerphones or headsets to mobile phones, giving the user a true hands-free experience and a greater sense of freedom.

Bluetooth is easy with Jabra

Many of Jabra's Bluetooth products have dedicated, one touch pairing buttons, making pairing simple, quick and convenient.

You can find more detailed pairing instructions at www.jabra.com
